Step "0" Guide Program Review

In our readings and by sharing our problem at meetings, we see that our basic troubles are the same as everyone else's. We share a common problem – the obsession of lust, usually combined with a compulsive demand for sex in some form. Whatever the details of our problem were, we identified with one another on the **inside** – we were dying spiritually – dying of guilt, fear and loneliness as we came to see that we shared a common problem.

Our definition of sobriety represents, for us, the basic and necessary condition for lasting freedom from the pain that brought us to Sexaholics Anonymous (SA). We have found that nothing else works. **When we have tried** to deny what our common experience has taught us, we have found that recovery still eludes us. And this seems to be true whether we are male or female; married or single; whether our acting out was with the same or opposite sex; whether our relationships were "committed", "meaningful" or one night stands; or whether we just resorted to a little sex with self as a "physical outlet". As the men and women of Alcoholics Anonymous learned over fifty years ago, "half measures availed us nothing". What we have seen and heard so much about is a "happy and joyous freedom" from a state of hopelessness. We have developed the following questions to help guide and direct our thinking, and discussions with this group and/or another member of this fellowship. The purpose of the questions are to:

1. To help build a foundation for our current support/recovery program.
2. To help stimulate thought on what are our personal goals and commitments to recovery are.
3. To provide a short checklist for future review in evaluating our spiritual development; and the minimum requirements for maintenance guideline.

We are now taking responsibility for our own recovery by working the steps.

THE PROCESS IS TO BE ENJOYED
